Representative DAN KELLY DYER

Another installment in our Destination series highlights flying in the Colorado Rockies. Extensive training and planning is necessary to achieve the rewards of sweeping aerial views and successfully tackling those challenging high altitude airports. We will discuss pre-trip training, emergency preparedness, route planning, weather considerations, safe flying through mountain passes, as well as what to do once you reach your destination.

This seminar is presented by a team of pilots and CFIs who recently completed a five-day trip in the Colorado Rockies. Seven planes and 19 pilots flew 2,500nm and 20 flight hours on a route that included Santa Fe, NM; Aspen, Durango, Gunnison, Leadville, Steamboat Springs, and Telluride, CO; and Las Vegas, NV.

Directions: Located in the Skyway Building, next to the Hiller Aviation Museum. Parking and entrance behind building. Suite 215 is upstairs in the northwest corner.

A message from the National FAASafety Team Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
